Abstract (en)
[origin: WO9620613A2] The present invention provides a bib (20) having a filamentary network (60) disposed between a paper topsheet (40) and a plastic film backsheet (80). The filamentary network (60) can comprise a polymeric net having openings sized to prevent tearing of portions of the topsheet or backsheet from the bib. In one embodiment the filamentary network can comprise a nylon net having openings with a maximum width less than about 0.25 cm.
