Abstract (en)

[origin: DE19505343A1] In order to achieve a simplified construction of the cleaning fluid feed in a hard surface cleaning device, especially a window wiper, with a suction head (1) on which is secured a flexible squeegee (3), beside which there is at least one suction aperture (2), with an outlet aperture on the suction head (1) for a cleaning fluid with an inlet for said cleaning fluid and an actuating component (13, 14, 15) to supply said fluid through the outlet aperture (10), it is proposed that a supply container (18) be fitted on the suction head (1) to hold a supply of cleaning fluid.
