Abstract (en)

[origin: EP0803210A1] The packaging pocket for a cosmetic paste comprises front (3) and rear (2) sheets assembled along a sealing line (S) to contain a thin layer of the paste. The flexible front transparent plastics sheet has several small diameter perforations (6) permeable to the paste. The flexibility of the front sheet is such that it can be pressed against the rear cardboard sheet by the user's finger enabling withdrawal of the paste and complete emptying of the pocket.
