Abstract (en)

[origin: EP0803379A1] The cheque card has a centre layer of paper to which a foil layer is adhered at the front and back. The front surface (3) of the front foil layer (4) carries a printed image (7), covered by a protective coating (8). The front and rear foil layers are applied directly to a defined area of a printed form enclosed by a perforation line, for easy separation of the cheque card from the remainder of the form.
