Abstract (en)

[origin: EP0803448A1] At least one of the faces (6) of the box has two parallel edges which each have a protruding flap. The flaps are formed by sections (5,8) of the blank folded up with the corresponding face. Fixing is effected by at least two parallel rail pieces which hold the flaps. The flaps lie in the plane of the corresponding face, and are provided over almost the whole length of the respective edge.
