Abstract (en)

[origin: EP0803457A2] A carrier (1) is positioned on the sheet stack (2) in the upper rear face area, and on the carrier the stripping element is guided to move between its at-rest position and its swung-out position, and in its at-rest position is spring-loaded. The carrier is spring-loaded against the rear side of the stack, and is in the form of a lever which by one end can swivel over the rear end area of the stack around an axis orientated at right angles to the sheet feed direction, and by its free other end is positioned on the stack.
