Abstract (en)
[origin: EP0803684A2] The heating radiator has relatively spaced heating plates coupled together at the top and bottom via T-shaped end pieces, with a slotted top grid (2) fitted over the space between the heating plates, which is bridged by a cover plate (1) at either side. The side cover plates are secured to the adjacent end of the slotted top grid via indents (211) formed in the end faces of the top grid with slits (212) parallel to the grid plane for reception of locating tongues (14) projecting from the top ends of the side cover plates.
