Abstract (en)

[origin: WO9607416A1] The present invention provides methods of treating a human or other animal subject having a bone metabolism disorder, consisting essentially of the steps of: (a) administering to said subject a safe and effective amount of an antiresorptive compound, during a period of greater than about 6 months; (b) administering to said subject a safe and effective amount of a parathyroid hormone, during a period of from about 3 to about 12 months.
