Abstract (en)

[origin: WO9717660A1] An administrative interface operating with a relational database management system in a distributed computer environment, and including a plurality of files reflecting both network conditions and network objects, at least with respect to Management (120), running Processes (121), Events (122) affecting same, Configuration (123), Files (124), Scripts (125) and Errors (126), as well as means for accessing and/or handling files. Said interface is useful in database management systems.
