Abstract (en)

[origin: EP0805088A1] At least one support pin (31) projects from the car support assembly (3), passes through the roof (11) of the car in an opening (12), and by its lower free end is fastened to a support plate (32). At least one damping element rests upon the support plate and on the inner side of the car roof. The clear cross section of the opening in the roof exceeds the cross section of the support pin and is preferably twice the size.
