Abstract (en)
The unit consists of a container (3) with a lid, fitted inside a surrounding frame divided horizontally into upper (7) and lower (9) sections. The lower section has slots (17) and recesses (19) in its base (13) for a fork lift truck. The container and its lid are each made in one piece with the two sections of the surrounding frame, and of the same or different plastic materials. The interior of the container is protected by a liner of a supple material with a rigid rim, and its lid fits in place by means of a bayonet joint. In addition, access can be gained to the container without opening the frame, using an aperture in the upper frame member and a removable stopper in the lid.

Abstract (fr)
Il s'agit d'une unité de transport et de stockage séparable entre une partie supérieure (7) et une partie inférieure (9), telles que la partie inférieure (9) comprend une cuve centrale (3) en plastique à large ouverture d'accès, entourée d'une armature (11) de protection raccordée à une ceinture d'embase (13) accessible à un chariot de manutention et la partie supérieure (7) comprenant un couvercle (23) de fermeture de la cuve, entouré d'une armature complétant celle de la cuve et se raccordant à une ceinture supérieure. Application au conditionnement en particulier de matières liquides ou visqueuses. <IMAGE>
