Abstract (en)

[origin: EP0805119A1] The intermediate cross member (4) and the hydraulic cylinders (8) of the load bearing assembly are located inside the outer contour of the frame (9) when viewed in plan and from the side. The hydraulic cylinders, when viewed in the horizontal position of the frame, are located at the side next to the connecting element (3). A rotating device (6) is located between the connecting element and intermediate cross member and rotates the container (7) around a vertical axis which is located inside the outer contour of the frame.
