Abstract (en)

[origin: EP0805316A2] The two adjacent funnel bases (20c) of the inner container (30) each has a through-hole (20d) for the attachment of assembly components. At least one funnel serves to accommodate a conical structural element (200) which is fastened on the funnel base by fixing element (201) which fits in the through-hole. The housing formed by the conical element has at least one electrical or electronic component which is fitted to the conical element by a suitable fixing.
