Abstract (en)  
[origin: WO9623288A1] The invention concerns a playing system for entertainment machines (2) with interchangeable games, wherein the entertainment machines (2) are provided with storage devices (22), and game programmes and data are stored in a central memory. The entertainment machines (2) are connected to the central memory. The stored game programmes and data are read out of the memory for the entertainment machines (2) as necessary and stored in the appropriate storage device (22).
