Abstract (en)
[origin: WO9623294A1] Sound absorbers of a plurality of tubular resonators (10), the sound apertures Ao of which border a common surface A and are distributed in such a way that the interaction regions Aw of said individual sound apertures Ao are distributed so as to cover the largest surface possible while not substantially overlapping. Preferred embodiments consist of extruded plastic mouldings (7, 9) of suitable mechanical rigidity and acoustic inertia.
