Abstract (en)

[origin: EP0806619A2] Equipment for storage and ventilation of droppings in a droppings drying tunnel (12), comprising a support structure (13) for a plurality of longitudinally extending surfaces (16) for supporting and holding droppings, wherefrom said droppings are periodically loaded and unloaded, and means of ventilation of the droppings. Said means of ventilation of the droppings comprise for each surface (16) for supporting and holding the droppings a respective set of ventilation blades (30) longitudinally aligned one in respect of the other and evenly spaced along said support and holding surface (16), and means for driving movement of said blades for ventilating the air inside said drying tunnel (12) over the droppings of the respective support and holding surface (16). <IMAGE>
