Abstract (en)  
[origin: WO9623690A1] A floating platform constructed of a combination steel/concrete. The platform has a hull or submerged buoyancy section (25) of concrete, from which concrete columns protrude upward (26, 27, 28, 29). The columns continue as steel columns (36, 37, 38, 39) up to a deck section (40) of steel. The steel columns are built separately and can be fully equipped before they are mounted upon and secured to the concrete part.
