Abstract (en)
[origin: WO9721607A1] An article carrier (12) having dispenser openings. The dispenser openings are in either a side panel (16) or end panel flaps (82, 84) and are designed to permit removal of one article (C) at a time from each of two stacked layers. Each dispenser opening is covered by a tear-away section (30) and is at least as long as the height of a packaged article (C). The height of the dispensers opening is less than the width of an article (C) throughout substantial portions of the dispenser openings (30). When the dispenser openings are in an end panel tear-away sections (30), the dispenser openings are provided in the end panel flaps (82, 84) as well as in underlying end panel glue flaps (108, 112).
