Abstract (en)

[origin: WO9624487A1] Plastic/metal laminates (for example, plastic-coated cable shielding or armoring tapes) having improved friction, adhesion, and heat-sealability properties which comprise at least one metallic substrate having directly adhered to at least one surface thereof a thermoplastic adhesive layer containing an amount of embosser sufficient to substantially lower the coefficient of friction of the laminate and sufficient to emboss the surface of the plastic/metal laminate.
