Abstract (en)
The manhole cover, e.g. for a pipe or cable inspection chamber, consists of a surrounding frame (1) and hinged panels (10,11,12,13) which form the lid. The panels are in the form of right-angled triangles hinged to adjoining sides of the frame so that each pair closed to make a square section of the lid. Each of the triangular panels except one, have a lug projecting from its edge which engages with the underside of the edge of an adjacent panel. The final panel with no lug is equipped with a locking mechanism which fixes it to the frame.

Abstract (fr)
La présente invention concerne un regard de chaussée à tampon articulé sur un cadre. Ce regard comprend essentiellement un cadre (1) avec un tampon constitué par des plaques triangulaires (2, 3) en forme de triangle-rectangle qui sont articulées sur deux côtés adjacents (1a), (1b) du cadre (1) pour, en position ouverte des plaques (2, 3), laisser un libre accès au cadre (1) sur deux côtés (1c, 1d) de ce cadre. Un tel regard de chaussée permet notamment de donner accès à des tranchées recevant des canalisations ou des câbles. <IMAGE>
