Abstract (en)
[origin: EP0808966A2] The chamber has a mainly trough-shaped housing (10) which may be formed in one piece, and has a cover (12) which can have more than one part, and which also has first ventilator (34). The ventilator has an internal opening at roughly the level of the underside of the cover. The chamber is watertight, and has further openings (35,36,40) with at least one opening (36) in the lower region of the chamber interior. The chamber has a shaft opening (35) in one of its side walls (20). The side wall may be raised relative to the remaining side walls (16,18,22), and may also form the foundation for a gravestone.
