Abstract (en)

[origin: WO9625357A1] An apparatus including a supply (3) of hot-melt material (4), and a pump unit (5) for feeding hot-melt material (4) to a volumetric gun (7) which in turn feeds the material into a mould cavity (24) including a cooling and transfer means (28). The apparatus is useful for making packing elements (39) for parts (37) made of a non-conductive material.
