Abstract (en)  
A dust bag comprising a flat, tube-shaped work piece of air-permeable material having two diametrically opposite folds (16) which are folded inwardly. The work piece is flattened in the plane of the folds, and the end parts (17,18) of the work piece are, at each side of said plane, folded about 180 DEG and fixed against the outside of the work piece to thereby form an opening (14) between the folds (16) through which dust-laden air is directed into the bag. <IMAGE>
