Abstract (en)
[origin: EP0810174A2] The stacker has a pre-collection device (4) with collection shaft (18) and pre-collection support (17). Two stacker baskets (7) are position on a carousel (6). A pressing-down fork (47) is positioned peripherally and stationary. A first holding-down appliance is positioned in the area of the pre-collection device, and a second holding-down appliance is located on the carousel. The first appliance has several holding-down elements (50,52), located on various sides of the collection shaft. The second appliance has several elements located on various sides of the stacker baskets. Both appliances are axially movable.
