Abstract (en)
An assembly for processing fibre materials comprises a filling shaft for a carding station having a leading section to take flocking from a flocking feed, and a following section to deliver a lap to the carding appts. A fibre cleaning system is between the two filling shaft sections. The fibre cleaning system is structured for flocking which have not previously been passed through a cleaning stage with a nip feed. Also claimed is an operation where flocking are fed into the shaft without a prior cleaning process with a nip feed.

Abstract (de)
In einer Anlage zur Verarbeitung von Textilfasern erfolgt die Feinreinigung an einer Stelle (33), wo der Fasermaterialstrom (160) schon (z.B. für das anschliessende Kardieren) aufgeteilt worden ist, beispielsweise im Kardenfüllschacht (31,34). <IMAGE>
