Abstract (en)  
The textile strand materials are joined to each other by web technique, can be adhered to one another, or are joined to one another by knitting technique. They are bound into the weave in the warp direction. The warp threads of the weave incorporate multi-filaments or rayon yarns, so do the weft threads. The textile strand materials can also be produced as monofilaments with a diameter of approximately 0.1 to approximately 0.5 mm. The cushion material incorporates a cover layer, which is preferably formed as a decorative layer in the form of a textile, artificial leather or plastic sheet.

Abstract (de)  
Es wird ein neuartiges Polstermaterial zur Polsterung von insbesondere solchen Flächen, die eine Belüftung oder Hinterlüftung benötigen, vorgeschlagen, wobei das Polstermaterial eine Vielzahl parallel zueinander angeordneter, textiler, luftdurchlässiger Strangmaterialien umfaßt, welche elastisch verformbar sind und zu einem handhabbaren Flächengebilde miteinander verbunden sind. <IMAGE>
