Abstract (en)
The container (1) comprises an inverted truncated pyramid shaped body open at the top. It has a series of transverse upper bolts (4) for its lifting onto a lorry (3) provided with a crane. The lifting bolts are located inside the peripheral reinforcement of the top opening. In one of the container sides and in its base are side gyratory and extractable lifting rods mounted laterally in a bolt. Once the container is placed on the ground and the upper lifting bolts are released the container can be raised by its lower lifting bolts and tipped to allow its emptying. The upper lifting bolts are accessed through a wide upper window which communicates with a lower evacuation window. The independent lower bolts are mounted in cavities in the container corners.

Abstract (fr)
Conteneur multi usages perfectionné, comprenant un corps (1) pyramidal tronqué renversé, ouvert supérieurement et pourvu d'arrimages supérieurs (4) pour son relevage et sa descente conventionnel, ainsi que d'autres arrimages inférieurs (5) giratoires et extractibles, permettant, un fois le conteneur posé sur la place correspondante et en le soulevant exclusivement par lesdits arrimages inférieurs, son basculement et le versage de son contenu, soit directement sur le véhicule (3) portant la grue qui le manipule, soit sur l'endroit de déchargement. <IMAGE>
