Abstract (en)
[origin: EP0811741A2] The sliding door has a control arm (27) which is formed relative to its pivotable joint (29) on the fixed base (17, 17a) as a three-armed lever (62-64). One lever arm (62) of the control arm grips the extension arm (20). The other two lever arms (63,64) are assigned to the drive and positioning cam (33) in two different control curve regions (67,68). The two regions are set at different height levels and partially in different longitudinal sections (67a,67b,68a-c).
