Abstract (en)
The watch(1) has several windows(2) in which appear simultaneously signs(3). The sign changing frequency for each window can be varied in a set manner. The windows(2) are arranged in the watch face(1) on concentric circles whose centre correspond to the watch face centre. The windows may be aligned along a radial line from the centre of the watch face. The signs, symbols, etc.(3), appearing in the windows(2), are carried on co-axial concentric discs(4,24,31) whose central axis(23) corresponds to the watch timing movement axis. The discs are rotated at specific speeds by means of a mechanism coupled with the timing movement of the watch. The speed relationships between the discs(4,24,31) are defined by intermediate movements co-operating with each other and coupled to the timing movement of the watch.

Abstract (fr)
Cette montre à cadran (1) comporte une pluralité de guichets (2) au niveau desquels sont susceptibles d'apparaître des signes (3) simultanément, la fréquence de changement des signes au niveau de chacun des guichets (2) variant d'un guichet à l'autre de manière bien déterminée. Les guichets (2) sont réalisés au sein du cadran (1) selon des cercles concentriques, dont le centre correspond au centre du cadran. <IMAGE> <IMAGE>
