Abstract (en)  
[origin: WO9626897A1] An apparatus (10) including a main apparatus (14) provided in situ in the processing unit (12) for producing hydrogen peroxide at a working concentration, and a back-up apparatus (16) for supplying the processing unit (12) in the event of a failure of the main apparatus (14). The back-up apparatus comprises a supply (18) of hydrogen peroxide at a storage concentration higher than the working concentration, and means (20) for diluting the stored hydrogen peroxide, arranged between the supply (18) and the processing unit (12) for lowering the storage concentration of the hydrogen peroxide to the working concentration.
