Abstract (en)

The method consists of fitting sections (2,3) to door (1) and frame on floor (4). The sections are rectangular, with one wall thicker than the others for fastening by screws (10). Special hinges (8) are used. Holes are provided in the outer wall of the sections to assist insertion of screws. A rigid strip may be passed through the section and screwed to the inner wall.

Abstract (fr)

Système porte/encadrement anti-pincendoigts, consistant à l'adaptation des profils en matière élastique, à dessin spécial, aux parties verticales de la portes, afin d'obtenir que la porte et l'encadrement, présentent tous deux des chants élastiques empêchant le pincement des doigts lorsque la porte est fermée d'une façon inespérée.
