Abstract (en)
[origin: WO9627530A1] The invention concerns a transport and/or storage container (1), in particular made of plastic, for articles to be transported such as tins, bottles or flasks. It comprises a holder unit (2) formed at least by a base (3), which forms a surface on which the transported articles can stand, and a panel-shaped positioning device (4) which lies parallel to the base (3) and is provided with perforations (27) for the transported articles. The positioning device (4) is connected via articulating elements (5) to the base (3) or to wall elements (6) on the base (3) at a distance (33) from the base (3) and can be adjusted vertically in relation to the base.
