Abstract (en)
[origin: DE19508644A1] A water outlet fitting (1) with a transmitter (4), a receiver and an electronic circuit for the contactless operation of an integrated non-return valve, in which the circuit is designed for operation in a plurality of selectable functions. On the fitting (1) there is a manually operable switch (5), especially a push-button which, when operated, can issue setting commands in the form of switching pulse groups in order to select and activate a given function.
