Abstract (en)
[origin: DE19508391A1] The invention relates to a pipe union (V), especially for air evacuation/water drainage pipes (2 or 3) and proposes, to obtain pipe connections which are easy to shift and provide a good flow while retaining the flexible basic design and without reducing the heat and noise damping properties, that the flexural strength be obtained by filling the inner space (6) between two flexible hoses (4, 5) secured together at their ends and fitting one inside the other with a foam (7) setting in the inner space (6).
