Abstract (en)
[origin: EP0814200A1] A span structure, such as a bridge, consisting mainly of a supporting structure built up from steel sections and a road surface connected therewith and composed of concrete elements. At the location of at least part of the joints (4) between successive concrete elements (3) there are arranged pressure means (7) suitable for applying in the concrete elements (3) compression forces acting in the span direction, transmittable to the supporting structure (1) at the ends (6) of the road surface. <IMAGE>
