Abstract (en)
[origin: EP0814211A1] Flame extinguisher for a free-head sewer comprising two vertical containers (2,4), each having a connection to a sewer pipe (1,5), which are connected in a communicating manner by a connecting pipe (3), which in each of the containers has an outlet at a lower level than the connection to the sewer pipe in the container concerned, the area of a perpendicular cross-section of the connecting pipe (3) being at most 50% of the area of a perpendicular cross-section of each of the containers and the difference in height between the lowest point of the connection to the sewer pipe and the highest point of the connecting pipe's outlet being at least 0.3 m in each container. <IMAGE>
