Abstract (en)

[origin: EP0814220A2] A single car garage structure (1) has a cut-out made in its roof (14) and a hood-shaped formation (21) is fixed to the roof covering the cut-out in order to accommodate the passenger saloon section (411) of the upper of the parked vehicles. A vehicle platform (3) is pivotably located on one side in a bearing (31) provided in the area of the rear wall (13) of the garage. Bearing frames are provided as pivot locations (31), which pivotably accommodate a pivot support (312) supporting the vehicle platform (3). The lifting device (32) engages on the vehicle platform on its free end opposite to the pivot bearing.
