Abstract (en)

The reinforcing profile (12) is arranged in, at least, one profile hollow chamber (11), and is made with materials with different heat conduction properties. The reinforcing profile may be put together with one or more metal shaped sections (13,14), and one or more plastic shaped sections (15). The metal shaped sections may be arranged in the profile hollow chamber, which may lie on the outer sides (2,3) of the chamber. There may be a bridging element of the plastic shaped section arranged between the metal shaped sections.

Abstract (de)

Die Erfindung betrifft ein Verstärkungsprofil (12) für Kunststoff-Hohlprofile zur Herstellung von Fenster, Türen oder dgl., welches in mindestens einer Profilhohlkammer angeordnet ist. Erfindungsgemäß ist das Verstärkungsprofil (12) zur Herabsetzung des Wärmedurchgangswertes aus Materialien mit unterschiedlichen Wärmeleitfähigkeiten gebildet. <IMAGE>
