Abstract (en)
[origin: EP0814635A1] The hearing aid comprises an input converter (12), an amplifier - and transmission arrangement (10), an output converter (14) and a calculation arrangement (20), which realises fuzzy-logic functions, and which responds to a output signal (22) of the amplifier- and transmission arrangement, providing a result signal (26). The result signal is conveyed to the amplifier- and transmission arrangement and influences their output signal (28). At least the calculation arrangement is provided as a digital circuit.
