Abstract (en)

[origin: US5901647A] PCT No. PCT/DE96/00437 Sec. 371 Date Sep. 18, 1997 Sec. 102(e) Date Sep. 18, 1997 PCT Filed Mar. 12, 1996 PCT Pub. No. WO96/29204 PCT Pub. Date Sep. 26, 1996 Various components in a rotary printing press are driven by suitable electric motors. Each component and its associated drive motor is provided with an angle position sensor. A tolerance range for the rotary angular position of each electric motor is selected. If the actual instantaneous angular position of the motor or component falls outside of the tolerance range, the rotary printing press is stopped.
