Abstract (en)
[origin: WO9630256A1] The present invention concerns a containership (20) having transverse lashing bridges (1) comprising lashing eyes (7) from which lashing rods (9) extend upwards to secure containers (8) at an upper level. The lashing bridges (1) have at least one substantially horizontal walkway (4) for handling of said lashing rods (9). Further, the walking level of the walkway (4) is arranged at a lower level than the lashing eyes (7, 17) to allow a person to carry out the lashing procedure standing in a substantially upright position.
