Abstract (en)

[origin: WO9630273A1] A dispenser for removing a fluid from a container (2), including a fixed part (3) with a portion (6) for attachment to the container and a generally cylindrical pouring portion (13), a side fluid outlet (14) being provided therein, a movable part (4) including a generally cylindrical sealing portion (21) tightly fitted into the pouring portion (13) of the fixed part (3), and provided with a side fluid outlet (24), and a head portion (22, 23) for grasping and operating the movable part (4). A tamper-proof strip (26) defines a first axial position of the movable part (4) relative to the fixed part (3), in which the side outlets (14, 24) in the two parts cannot be mutually aligned, and snap means (18, 25) define a second axial position of the movable part relative to the fixed part, in which the side outlets (14, 24) in the two parts may be mutually aligned by rotating said movable part (4).
