Abstract (en)

[origin: WO9629401A1] Human B-cell translocation genes-2 and 3 and polypeptides encoded by such genes and a procedure for producing such polypeptides by recombinant techniques is disclosed. Also disclosed are methods for utilizing such polypeptide for the treatment of aberrant cellular proliferation. Also disclosed are diagnostic assays for detecting susceptibility to diseases associated with mutations in the nucleic acid sequences encoding said polypeptides and for detecting altered levels of such polypeptides.
