Abstract (en)

[origin: EP0816070A1] According to the present invention there is provided a heat sensitive imaging element comprising on a hydrophilic surface of a lithographic base an image forming layer comprising at least hydrophobic thermoplastic polymer particles and a compound capable of converting light into heat, said compound being present in said image forming layer or a layer adjacent thereto, characterized in that onto said image forming layer is coated a covering layer having a thickness between 0.1 and 3  $\mu$  m.
