Abstract (en)

[origin: EP0816106A2] The label printed has and input with a number of keys for defining a label image to be printed, These keys include keys for defining the format of a label. A display is included for displaying an image, and a printing unit to produce the label. The label printer is controlled by a control unit to operate in layout mode, in which mode the display is caused to display an image of the label having the selected label format, and a number of layout parameters for defining the format Each parameter is alterable, where the label shown on the display alters with each selected alteration of the layout parameters by actuation of the format keys. The input unit includes keys for defining attributes of with input characters, and the control unit is arranged to control the label printer to operate in a character mode in which the display is caused by the control unit to show a characters with the selected character attributes and a number of character attribute parameters for defining the attributes. Each parameter is alterable, where the character shown on the display alters with each selected alteration of the character attribute parameter by actuation of the attribute keys.
