Abstract (en)

[origin: EP0816580A2] The fitting has a housing (4) having a drain trap (8). The fitting is fixable onto the basin's outlet (14) via connection of a cover part (5) with an outlet pipe (28). The fitting is grouted via an immersion pipe (11) reaching into the water level region of the housing and an outlet support (12) protruding at the side. The outlet pipe has a guide collar (31) which can slide up to distance relating to a minimum distance to the base (7) of the housing. The immersion pipe is located to be supported on at least three side webs which serve as end stops. The immersion pipe also has a collar (51) on its side facing the base, which is constructed to be supported on the outlet pipe.
