Abstract (en)
[origin: DE19626570C1] The plates (1) are preferably square, and laid on an underfloor in a set pattern so as to leave spaces for pipes, wiring etc. At one edge, each plate has a step (2) at one side, and at the other three steps (3) at the opposite side. The plates are laid in lines (4a-c), the first step (2) on each being always at right angles to the line. The plates in one line (4a,4c) fit by their bottom protruding steps under the top ones of the plates in the adjacent lines (4b,4d), and also support the top steps (2) on the plates in the same lines. The plates can be of fibre-board.
