Abstract (en)

[origin: EP0816966A1] The adjustment mechanism can be operated by either of two Bowden cables 6,7 that are fixed to a pair of cam transmission discs 9,10 each of which have profiled tracks into which follower pins 11,17 operate. One of these is fixed to the adjustment crank 2 by a pivot point 3. One of the discs 10 is pinned 19 to a fixed point such that by operating the Bowden cables the discs move in specific way relative to each other
