Abstract (en)

[origin: EP0817318A1] The input wire feed rail has a conductor section (16) with protruding section and two side wire holes (21) with securing section (23), for electrical conductors. The protruding section is secured by a channel section. The conductor section is covered by an isolating section. The isolating section has a closing shutter (26) which can close one of the wire openings as required.
