Abstract (en)

[origin: WO9630728A1] The invention concerns a device for measuring and/or checking the level of a fluid in a reservoir, with which it is possible to display at least a minimum and/or maximum level since said device can be introduced into an opening in the reservoir. The device comprises a handle disposed outside the reservoir and measuring means disposed inside the reservoir. The measuring means are provided with a cleaning device which can be operated by the handle.
